

VELVET

Traditional velvet is very soft and it has its shine, touching it, visible tracking marks will appear. This is easy fixable with any kind of cloth, smoothing it in the right direction (usually smooth down).

- Needs attention to look clean and fresh
- Slight sheen

NON-TRACKING VELVET

Non-tracking velvet is soft fabric without shine. This type of velvet is always smooth and you don't have to worry about tracking marks and fixing them.

- Always fresh and clean look
- Solid colour
